

FLEET PRESERVATION

"The Neutralizer"

Portable or mounted Undercarriage Wash Unit
by Enzo's

Safely removes corrosive and harmful salt build-up
from the undercarriage of road equipment and
prolong the life of you undercarriage frame rails,
oil pans, brake lines & body.

D-Salt will slow the corrosion process, neutralize the
salt & remove the crystallization that is forming on the
undercarriage & metal surfaces.

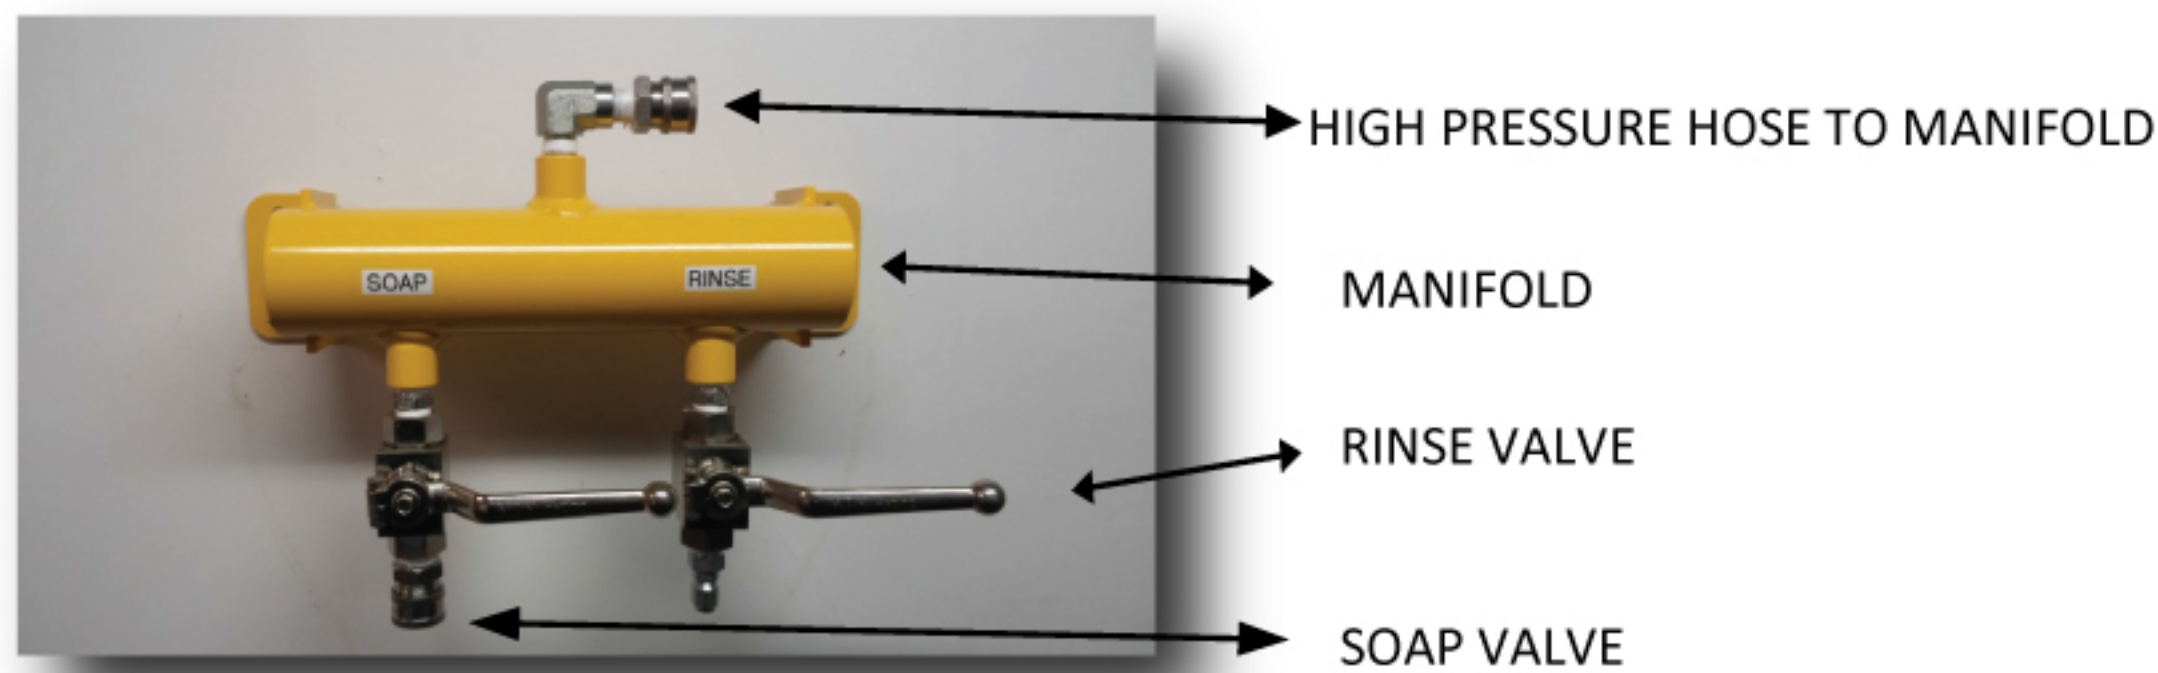

The Neutralizer requires a minimum Pressure washer
capacity of 4 Gallons per minute at 2000 PSI.

*Lifetime gaurantee on pads, center bar &
manifold when using our Salt Neutralizer Products*

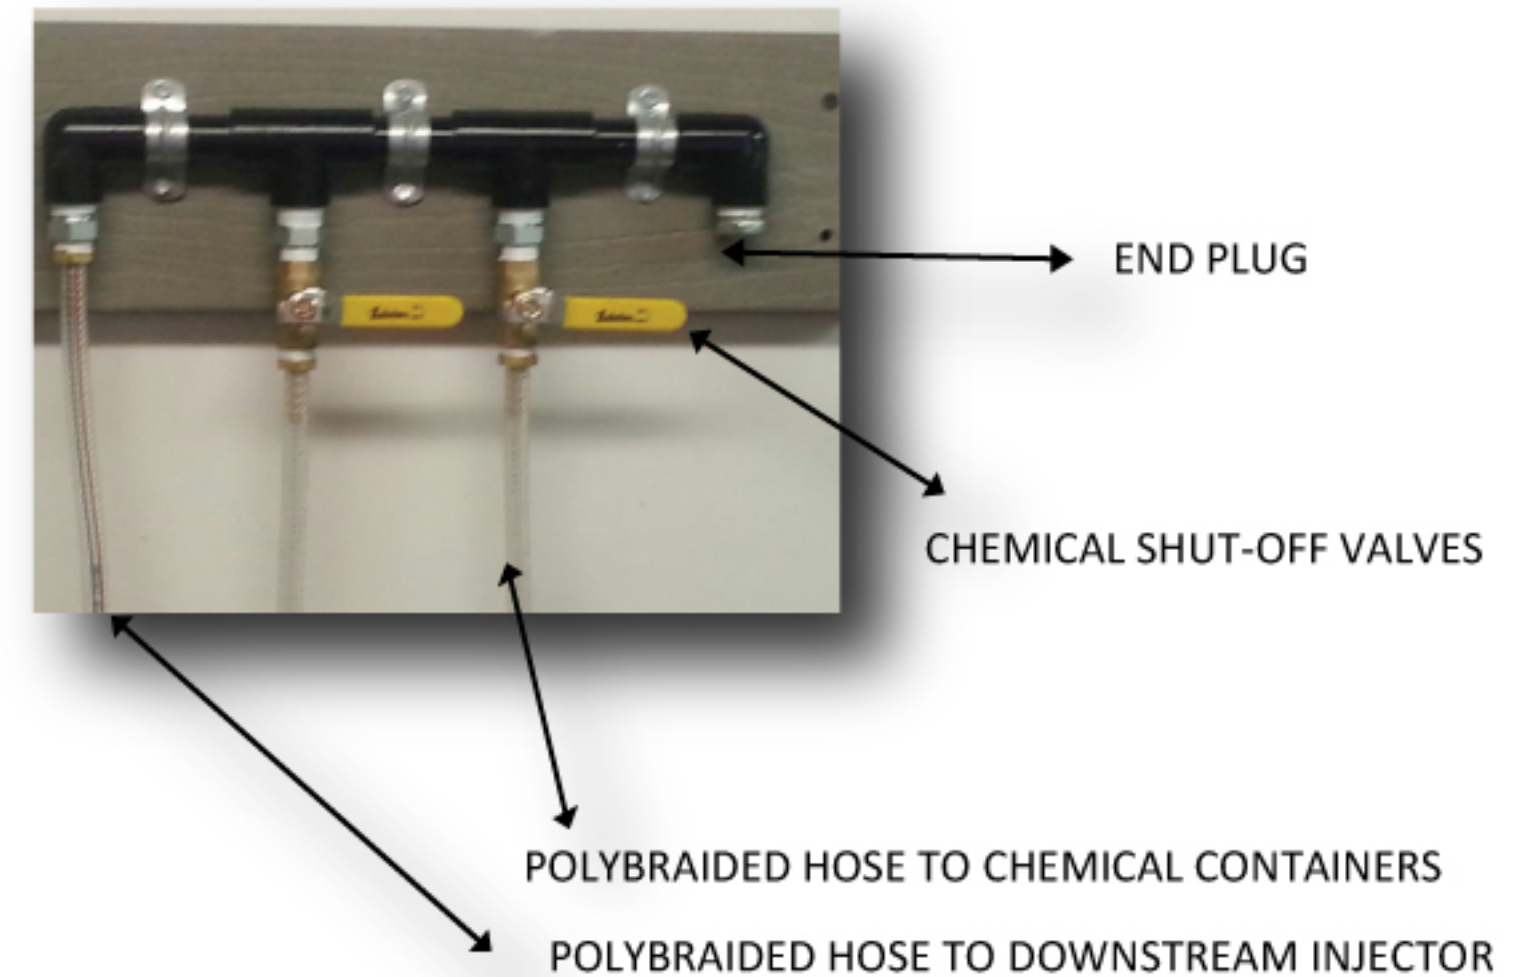

Undercarriage Manifold Assembly

Detergent Distribution System (DDS Board)

Allows the use of two chemicals

The Neutralizer is Manufactured
by Enzo's Cleaning Solutions, LLC
- a Sole Source Item

FLUID FILM

FLUID FILM's soft, active coating
penetrates to the base metal,
where it migrates to create a
formidable, protective barrier
that prohibits corrosion

Protects all Metals
No Solvents
Stops Rust on Contact
Non-toxic/Non-hazardous
Long Lasting
